DETAILED ACTION

Acknowledgements

The Examiner acknowledges the reply filed 04/08/2009 in which no claims were amended. Currently claims 1-8 are pending for examination in this application.

Allowable Subject Matter

The Examiner withdraws the allowability of the previously indicated claims 1-8, based upon the rejection below.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-8 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The **negative limitation** in the claim 1, “...*without the use if an automatic drive mechanism...*” is not supported in the specification (see MPEP 2173.05(i)).

Any negative limitation or exclusionary proviso **must have basis in the original disclosure**, see also Ex parte Grasselli, 231 USPQ 393 (Bd. App. 1983), aff 'd mem., 738 F.2d 453 (Fed. Cir. 1984). **The mere absence of a positive recitation** is not basis for exclusion. The Examiner cannot support of disclosure of an “automatic drive

mechanism" in Applicant's specification, or terms that define the spring as an automatic drive mechanism.

Further, the Examiner asserts that upon removal of the negative limitation the previous art rejection of Hunn (US2004/0158207) will once again be a basis of rejection (see non-final office action 04/30/2008).
